

# Film bag applicator Type „PullOver2“

## Technical data (standard):

Pallet sizes	800 x 1200 mm and 1000 x 1200 mm
Pallet height	2000 mm
Foil thickness	80 –200 µ
Capacity	40 – 80 pallets / hour depends on size

Siemens control

## Special versions on request

## Characteristics

- The PULL-OVER works with usual PE-heat shrinkable sleeve
- The foil cutting device is placed topside of pallet
- The shrink sleeve is opened by pneumatic guiding device, enabling the pneumatic grippers to take the film and put it completely over the pallet.
- The complete machine is very sturdy and suited for highest performance.
- Further foil sizes can be treated with an additional reeling device.
- All drives are controlled by frequency inverters.

## Options

- Further foil sizes with automatic change and adaption
- Plant with integrated pallet conveyer.
