

## ***ShrinkTwist***

Semi-automatic shrink machine with rotating arm  
Machine type: standing pallet

### **Options:**

- available with electric heaters
- equipped with double-arm
- conveyor technique

...and much more!

### **Advantages:**

- individual shrinking of commissioned goods
- perfect foil undershrink
- flexible top and undershrink course
- flexible operation programs
- moveable undershrink beams for different pallet sizes
- approved electric hot-air burner
- applicable with conveyor technology

### **Technical data – standard version:**

Optical control of the hoop guard  
Unlimited pallet weight  
Pallet sizes up to 1200 x 1000 mm  
Maximum pallet height 2000 mm (standard)  
Optical pallet height detection  
Electronic control unit  
Height of the rotating arm 3400 mm  
Foil thickness: 70 – 200 µ  
Gas type: propane gas  
Proved shrink machine with permanent electric stress ignition (according to DVGW and BG regulations)

Special options on request

### **Security:**

- Gas control
- Flame control
- Rotation control
- Collision protection
