

StretchLift OP 133 SA semi-automatic stretch wrapping machine

Technical data - standard

Lateral opening of the turntable with photo-electric cell as safety function
Maximum Pallet weight 1500 kg
Turntable diameter 1500 kg
Max. pallet height 2300 mm
optical pallet height detection
Fork lift truck enables mobility
Electronic control unit – Siemens S7
Turntable with soft start – fix stop
Capacity 30 pallets / hour
Different wrapping programs
Individual parameters
Siemens display
Quick install system

Special options on request

Options:

- Foil pre-stretch system POWER 2000: Electric motor pre-stretching (standard 140, 200 and 260%) protects the packing goods and reduces cost of material.
- Foil pre-stretch system POWER 3000 (up to 400%)
- Pallet height up to 3000 mm
- Electric top press
- Mounting frame for turntable
- Continuous control of foil carriage speed
- Foil cut device

.. and much more

Operation mode:

- Fix the foil on the pallet or the packaged good
- Determine the program (one-way, double windings or protective hood)
- Determine number of wraps at the top and at the bottom
- Start program
